Working together for a safe, engaging, and productive workplace

Incident Reporting

Provide your staff with Mismo's secure communication portal to report workplace issues to management as they happen.

- 24/7 Incident Reporting
- Secure Conversation Portal
- Documented Response and Resolution

Proactive Communication

Mismo's automated prompts put in control and privately engage with your employees to alert you of any workplace violations or wage and hour issues on a regular basis.

Companywide

Announcements Updated

Mismo's innovative memo component helps you distribute vital information to your workforce in the office or working remotely and requires a documented confirmation that each employee has read and understood the information given.

Documentation

All interactions in the Mismo system are documented, time-stamped, and stored per employee. This information can be pulled as detailed reports when needed. Your employee files augmented.

About Us

We designed the Mismo system to disrupt the norm of how businesses handle employment violations. Mismo helps protect a company as a whole from the damages an employment lawsuit can bring. Our system gives employers and their employees a better and proactive way to report and resolve employment violations and incidents in the workplace before they escalate. We firmly believe in the importance of employers and employees working together to achieve a positive, open, and productive work environment free from harassment. Knowledge is key and you cannot fix what you don't know. Mismo is the solution to protect your company while protecting your employees.
